MAPFRE

We care about what matters to you

2022-24 Strategic Plan on track and commitment to sustainable dividend path

Robust growth trends with tailwinds from currencies and reinsurance pricing

PREMIUMS +10.6%*

IBERIA +3.4%*

MAPFRE RE +18%

BRAZIL +23%*

Disciplined growth in profitable lines of business, leveraging **multi-channel approach**

Benefitting from **currency appreciation**

Favorable **reinsurance pricing**

Focus on **organic growth** and **prudent M&A** strategy

Diversification is key, with a streamlined organization, focused on profitability

Resilient profitability

High level of **business diversification**

Improved technical margins in **General P&C and Life Protection**, mitigating pressure on Motor

Strong contribution from **improving interest rate environment**

Main restructuring and streamlining goals have been reached

Motor profitability initiatives are beginning to deliver in some markets, while others need more time

Challenging context > claims inflation, changes in driving patterns and higher mobility

Profitability initiatives > rate increases on new business & renewals, cost contention and strict underwriting

- **Brazil** > speedy portfolio repricing and improving combined ratio
- **Spain** > technical measures to adapt to inflationary environment taking time to feed through P&L
- **USA** > challenging recovery in a complex market

Exceptional financial strength and flexibility, underpinned by balance sheet diversification

Strong Solvency II ratio (220%) as of **June 2022**, boosted by April **Tier 3 issuance**, mitigating the **fall in shareholders' equity**

High level of liquidity and comfortable with **current debt position**

Prudent approach to investments > limited credit risk and lower portfolio duration

Strong dividend upstreaming, allowing for interim dividend of 6-euro cents to be paid on November 30th

* Adjusted at constant exchange rates and excluding the impact of the multi-year policy in Mexico and the exit of BANKIA Vida in 2021, as applicable

Key Figures > 9M 2022

	9M 2022	Δ

Closing remarks

Diversification continues to be key in a challenging market context

Robust growth and **resilient profitability**

MAPFRE RE is a strong contributor to results, despite higher Nat Cat frequency

Strong premium performance and profit contribution **across Latin America**

Motor profitability plan executed and now waiting for delivery in some markets

2022-24 Strategic Plan has been launched and is **on track**

Sustainable dividend path, underpinned by solid **financial strength** and flexibility

Strong commitment to shareholders and society as a whole

Moving forward with **transformation**, and **restructuring** process coming to an end

Annex: IFRS 17&9 – Ready to go live

Timeline

What's new?

- Disclosure of new insurance contract figures
- New valuation methods for insurance contract*
 - Premium Allocation Approach for contracts representing ≈70% of total premiums at 12/31/2021
 - For rest of the contracts: Building Block Approach (≈ 25%) and Variable Fee Approach (≈ 5%)
- Mark to market liabilities: eliminating need for shadow accounting
- Potential losses in assets and liabilities will be brought forward:
 - Fixed income impairment: from incurred to expected loss approach
 - Onerous test for insurance contracts
- “Fair Value with changes in OCI” equity portfolios (PAA): realized capital gains & losses recorded directly in other comprehensive income (OCI), not P&L. These portfolios will not be subject to impairment tests.

Entry into force of the new standards is expected to have the following implications:

Strategy and business management

- Group business strategy should be unaffected
- For management purposes current KPIs will be kept in parallel with new IFRS KPIs for the time being
- No major change expected in underwriting & investment risk appetite
- Investment policy and portfolio mix should remain unchanged (99% of total assets currently pass SPPI test), continuing with active ALM to avoid accounting mismatches
- Equity portfolio could be allocated to “Fair Value with changes in OCI”, balancing appetite for P&L volatility and capital gains

Implications for capital management

- Dividend upstreaming should not be significantly impacted as they are regulated under local GAAP
- Cash generation and solvency position should not be affected
- No relevant fixed income impairments expected and credit risk exposure will continue to be actively managed

Annex: IFRS 17 – Valuation approaches

IFRS 17, fulfilling its purpose of homogenizing international insurance accounting practices, includes three valuation approaches for insurance contracts:

Building Block Approach (BBA)

General Assessment approach /Default approach

The objective of this method is to assess fulfillment cash flows using a dynamic calculation, updating hypotheses with each calculation, and recognizing expected profit from the contract or CSM, through its allocation to P&L as service is provided throughout the coverage period.

This approach comprises:

1. Fulfillment cash flows, which include:
 - Present value of expected future cash inflows and outflows that will arise over the length of the contract;
 - An adjustment to reflect the time value of money and other financial risks, like liquidity and exchange rates
 - An explicit adjustment for non-financial risk
2. Contractual Service Margin (CSM), which will represent unearned profit from contracts. If CSM is negative, the contract will be considered onerous and the balance sheet CSM will be zero, recording the loss in the income statement at the time of inception of the contract, as established by the standard.

Variable Fee Approach (VFA)

Variation of the default approach (BBA) which is applicable to contracts with significant direct participation features.

Premium Allocation Approach (PAA)

Simplification of the BBA and can be optionally used for contracts with coverage of one year or less, or in those specific cases in which, although the contract duration is greater than one year, the assessment is not expected to vary materially from the BBA. This approach has similarities with the current Unearned Premium Provision approach.

Based on technically defined directives, MAPFRE believes that, in general, it will assess insurance and reinsurance contracts as follows:

Insurance contracts	
Life and Non-Life lines with duration of <1 year(*)	PAA
Burial line	BBA
Life contracts with duration >1 year	BBA
Contracts with direct participation (Unit Linked and certain life products with profit-sharing)	VFA
Reinsurance contracts	
Ceded	PAA
Accepted	PAA/BBA
Retroceded	BBA

*Non Life contracts with duration greater than one year but with no material difference from BBA expected will also be measured using PAA

Annex: IFRS 17&9 – Valuation approaches and impact on asset and liability side

Valuation approach	Type of product	Liability	Asset	Remarks
Building Block Approach (BBA)	Burial	Variations in yield curve (risk-free curve + spread) reflected in OCI	≈100% Fixed Income portfolios measured at FVOCI with recycling in P&L	If durations and yields are matched, there will be no asymmetries or impact in OCI
	Life matched			
	Life Savings w/o PS > 1 year			
Variable Fee Approach (VFA FVTPL)	Unit Linked	Liability measured at FVTPL linked to the performance of underlying assets	Assets measured at FVTPL	No asymmetries or impact in OCI
Variable Fee Approach (VFA disaggregating in OCI)	Life with PS	Variations in yield curve (risk-free curve+spread) are reflected in OCI	Fixed income measured at FVOCI with recycling in P&L	If durations and yields are matched, there will be no asymmetries or impact in OCI
		Variations in Equity and Funds are adjusted by estimating the future PS in P&L	Equity measured at FVTPL	No asymmetries or impact in OCI
			Funds measured at FVTPL	
Premium Allocation Approach (PAA)	Own funds portfolios, Life and Non-Life < 1 year	Risk-free curve discount	Fixed income measured at FVOCI with recycling in P&L	Both the variation in the risk-free curve and the credit spread will be reflected in OCI
			Equity measured at FVOCI without recycling in P&L	No possibility to manage the impact in P&L
			Funds measured at FVTPL	Higher volatility in P&L

PS: Profit sharing

OCI: Other Comprehensive Income

FVTPL: Fair Value through P&L

FVOCI: Fair Value through Other Comprehensive Income

This document is purely informative. Its content does not constitute, nor can it be interpreted as, an offer or an invitation to sell, exchange or buy, and it is not binding on the issuer in any way. The information about the plans of the Company, its development, its results and its dividends represents a simple forecast whose formulation does not represent a guarantee with respect to the future performance of the Company or the achievement of its targets or estimated results. The recipients of this information must be aware that the preparation of these forecasts is based on assumptions and estimates, which are subject to a high degree of uncertainty, and that, due to multiple factors, future results may differ materially from expected results. Among such factors, the following are worth highlighting: the development of the insurance market and the general economic situation of those countries where the Group operates; circumstances which may affect the competitiveness of insurance products and services; changes in the basis of calculation of mortality and morbidity tables which may affect the insurance activities of the Life and Health segments; frequency and severity of claims covered; effectiveness of the Groups reinsurance policies and fluctuations in the cost and availability of covers offered by third party reinsurers; changes in the legal environment; adverse legal actions; changes in monetary policy; variations in interest rates and exchange rates; fluctuations in liquidity and the value and profitability of assets which make up the investment portfolio; restrictions in the access to third party financing.

MAPFRE S.A. does not undertake to update or revise periodically the content of this document.

Certain numerical figures included in the Investor Presentation have been rounded. Therefore, discrepancies in tables between totals and the sums of the amounts listed may occur due to such rounding.
